

COMPANY PROFILE · JULY 2026

Engineering Reliable Digital Solutions

StackBridges Technologies is a software engineering and cloud consulting firm helping organizations across Africa design scalable software, modernize cloud infrastructure, and accelerate digital transformation.

ABOUT

Built on technical rigor and trust

Founded in 2026 in The Gambia, we combine international engineering standards with a deep understanding of African and emerging markets. We deliver end-to-end technology services for enterprises, government, financial institutions, NGOs, and startups.

MISSION

Modernize technology, develop local talent

To help organizations modernize through world-class software engineering, cloud solutions, and digital transformation — while developing local technology talent and contributing to Africa's digital future.
